

SSCAFCA Development Process Manual

Chapter 22, Hydrology and Hydraulics

Review Comment Period Completed on July 6, 2009

SSCAFCA prepared the [Drainage, Flood Control and Erosion Control] portion of the Development Process Manual (DPM) using the City of Albuquerque's as a guide. This effort was undertaken at the request of the City of Rio Rancho in their effort to prepare their own DPM. This effort was undertaken with input from the private sector and City staff from Rio Rancho. The major addition to the DPM is the inclusion of HEC-HMS modeling capability. The comment period was open for 30 days from June 5, 2009 to July 6, 2009 during which one comment was received and acted upon prior to adoption by the Executive Engineer on July 31, 2009. An electronic copy is available on SSCAFCA's website (www.sscafca.com) or a paper copy is available for reviewing at SSCAFCA's office located at 1041 Commercial Drive in Rio Rancho.
